SUBJECT INDEX

Alloys
absorption of H_2 in Pd–Co and Pd–U alloys, 375
absorption of H_2 in ultrathin Pd and Pd-based alloys, 61
effect of H_2 absorption on the electronic and structural properties of V–Fe alloys, 307
electrical resistance and H_2 solubility anomalies in a Pd–8at.%Y solid solution alloy, 79
magnetoresistance and magnetic susceptibility of hydrides of disordered Ni–Mn alloys, 201
solubility of H, D and T in Pd–Ag alloys at low H_2 concentrations, 387
surface study on thin layers of oxidized Ti–Fe alloys as semiconducting photoelectrodes for the production of H_2, 529
the influence of hydrogenation on the magnetic properties and hyperfine interactions of amorphous Fe–Zr alloys, 17
Aluminium
electron binding energies and oxidation behaviour in UNiAl, YNiAl and ZrNiAl, 503
electron–phonon coupling and superconductivity of H_2 implanted aluminium, 123
in situ electron microscopy study of implanted AlH_x, 133
modifications near the surface owing to H_2 cycling of the intermetallics $LaNi_5$ and $LaNi_{5-x}Al_x$, 491
on the breakdown of the Fe sublattice long-range magnetic order in RFeAl hydrides (R ≡ rare earth), 181
Anelastic relaxation
anelastic relaxation due to the tunelling of H and D in some transition metals, 206
Atomic structure
physical properties of metal–hydrogen systems: some new aspects related to the electronic and atomic structure, 1
Autoclave
clean autoclave system for crystal growth and phase diagram studies (about 2500 bar, 1700 °C), 543

Catastrophes
spinodals and catastrophes, 544
Cerium
H_2 induced changes of valency and hybridization in Ce intermetallic compounds, 97
low temperature electronic properties of Ce hydrides, 239
Channelling method
lattice location study of H in Ta by the channelling method, 207
Cobalt
absorption of H_2 in Pd–Co and Pd–U alloys, 375
comparison of structures and electronic properties between $TiCoH_x$ and $TiFeH_x$, 69
effect of Ni, Gd and La substitution on the magnetic properties of Y_2Co_7 hydride, 47
enthalpies of formation and hydrogenation of $LaNi_{5-x}Co_x$ compounds, 542
experimental and theoretical investigation of the densities of states of Mg_2CoH_5, 267
the calculation of the electronic properties of the monohydride of Co by the LMTO method, 261
Conversion electron Mössbauer spectroscopy
conversion electron Mössbauer spectroscopy on surface layers of activated FeTi, 511
Crystal growth
a clean autoclave system for crystal growth and phase diagram studies (about 2500 bar, 1700 °C), 543
Crystallographic properties
magnetic, crystallographic and H_2 absorption properties of YMn_2 and $ZrMn_2$ hydrides, 25

© Elsevier Sequoia/Printed in The Netherlands

Density of states
electronic density of states from pressure–composition isotherms in metal hydrides, 307
experimental and theoretical investigation of the densities of states of Mg_2CoH_5, 267
Dysprosium
γ–γ PACS of Dy hydrides, 155
thermodynamic studies of hydrides of R_6Fe_{23} (R = Y, Er, Ho, Lu) and R_6Mn_{23} (R = Gd, Dy, Er, Ho), 421

Electrical resistance
electrical resistance and H_2 solubility anomalies in a Pd–8at.%Y solid solution alloy, 79
Electric field gradient
calorimetric determination of the e.f.g. in $TaH(D)_{0.5}$, 542
Electron binding energies
electron binding energies and oxidation behaviour in UNiAl, YNiAl and ZrNiAl, 503
Electronic properties
comparison of structures and electronic properties between $TiCoH_x$ and $TiFeH_x$, 69
effect of H_2 absorption on the electronic and structural properties of V–Fe alloys, 307
electronic properties of $LaNi_5$ and $LaNi_5H_7$, 219
low temperature electronic properties of Ce hydrides, 239
magnetic and electronic properties of Hf_2Fe hydrides, 163
the calculation of the electronic properties of the monohydride of Co by the LMTO method, 261
Electronic rearrangement
electronic rearrangement in the dilute V and Nb hydrides, 209
Electronic structure
calculations of the electronic structure of disordered transition metal dihydrides, 229
electronic structure and total energy calculations for transition metal hydrides, 249
electronic structure of hydrogen in Ni and its trapping by impurities, 275
photoemission study of the electronic structure of Zr–Pd compounds and their relation to hydride formation, 301
physical properties of metal–hydrogen systems: some new aspects related to the electronic and atomic structure, 1
^{51}V NMR and magnetic susceptibility study of the electronic structure in Ti–V dihydrides, 193
Electron microscopy
in situ electron microscopy study of implanted AlH_x, 133
Embedded atom method
calculation of H_2 dissociation pathways on Ni using the embedded atom method, 465
Erbium
effects of rhombohedral distortion on the magnetic properties of $REFe_2$ hydrides (RE = Er, Tb), 89
thermodynamics of the $ErFe_2$–H(D) system, 309
thermodynamic studies of hydrides of R_6Fe_{23} (R = Y, Er, Ho, Lu) and R_6Mn_{23} (R = Gd, Dy, Er, Ho), 421
Europium
proton NMR in the ferromagnetic hydride $EuLiH_3$, 105

Ferromagnetism
proton NMR in the ferromagnetic hydride $EuLiH_3$, 105

Gadolinium
effect of Ni, Gd and La substitution on the magnetic properties of Y_2Co_7 hydride, 47
proton NMR in the paramagnetic state of GdH_3, 187
thermodynamic studies of hydrides of R_6Fe_{23} (R = Y, Er, Ho, Lu) and R_6Mn_{23} (R = Gd, Dy, Er, Ho), 421

Hafnium
magnetic and electronic properties of Hf_2Fe hydrides, 163
Heat of solution
a new approach to the heat of solution of H_2 in metals, 541
Holmium
thermodynamic studies of hydrides of R_6Fe_{23} (R = Y, Er, Ho, Lu) and R_6Mn_{23} (R = Gd, Dy, Er, Ho), 421
Hydridoaluminates
evolution of metal–H bonds in hydridoaluminates, 371

Hydrogen absorption properties
magnetic, crystallographic and H_2 absorption properties of YMn_2 and $ZrMn_2$ hydrides, 25
Hydrogen depth profiles
analysis of H_2 depth profiles in a Ta–Ti sandwich film by the ^{15}N reaction method, 525
Hydrogen isotopes
solubility of H, D and T in Pd–Ag alloys at low H_2 concentrations, 387
Hydrogen–metal interaction
theory of H_2 interaction with metals, 475
Hydrogen solubility
electrical resistance and H_2 solubility anomalies in a Pd–8at.%Y solid solution alloy, 79
the temperature variation of H_2 solubility in metals, 545
Hydrogen storage material
surface properties of $LaNi_3Mn_2$ H_2-storage material, 517
surface properties on H_2 storage material TiFeMm, 535
Hyperfine interactions
the influence of hydrogenation on the magnetic properties and hyperfine interactions of amorphous Fe–Zr alloys, 17
Hysteresis
new experiments on and interpretations of hysteresis effects of Pd–D_2 and Pd–H_2, 351

Imaginary binary hydrides model
on the "imaginary binary hydrides" model, 329
Intermetallics
H_2 induced changes of valency and hybridization in Ce intermetallic compounds, 97
modifications near the surface owing to H_2 cycling of the intermetallics $LaNi_5$ and $LaNi_{5-x}Al_x$, 491
Iron
adsorption and subsequent dissolution of H_2 in $FeTi_{1.14}O_{0.03}$, 497
comparison of structures and electronic properties between $TiCoH_x$ and $TiFeH_x$, 69
conversion electron Mössbauer spectroscopy on surface layers of activated FeTi, 511
effect of H_2 absorption on the electronic and structural properties of V–Fe alloys, 307
effects of rhombohedral distortion on the magnetic properties of $REFe_2$ hydrides (RE = Er, Tb), 89
hydriding behaviour of FeTi and $FeTi_{1.15}$: ease of activation and skipping of β region, 139
H_2 in Fe, V and FeV: heat of formation, lattice location and the hydrogen–metal bond, 285
H_2 profiling in FeTi, 463
magnetic and electronic properties of Hf_2Fe hydrides, 163
on the breakdown of the Fe sublattice long-range magnetic order in RFeAl hydrides (R = rare earth), 181
surface properties on H_2 storage material TiFeMm, 535
surface study on thin layers of oxidized Ti–Fe alloys as semiconducting photoelectrodes for the production of H_2, 529
the activation of FeTi for H_2 absorption: progress and possibilities, 459
the influence of hydrogenation on the magnetic properties and hyperfine interactions of amorphous Fe–Zr alloys, 17
theoretical study of the X-ray absorption spectra of Mg_2FeH_6, 293
thermodynamics of the $ErFe_2$–H(D) system, 309
thermodynamic, structural and magnetic properties of $LaNi_{5-x}Fe_x$ hydrides, 111
thermodynamic studies of hydrides of R_6Fe_{23} (R = Y, Er, Ho, Lu) and R_6Mn_{23} (R = Gd, Dy, Er, Ho), 421

Lanthanum
effect of Ni, Gd and La substitution on the magnetic properties of Y_2Co_7 hydride, 47
electronic properties of $LaNi_5$ and $LaNi_5H_7$, 219
enthalpies of formation and hydrogenation of $LaNi_{5-x}Co_x$ compounds, 542
modifications near the surface owing to H_2 cycling of the intermetallics $LaNi_5$ and $LaNi_{5-x}Al_x$, 491
surface properties of $LaNi_3Mn_2$ H_2-storage material, 517

thermodynamic, structural and magnetic properties of $LaNi_{5-x}Fe_x$ hydrides, 111
Lattice–gas model
ordered phases in Nb hydride: predictions using lattice–gas models, 319
Linear muffin-tin orbital
the calculation of the electronic properties of the monohydride of Co by the LMTO method, 261
Lithium
proton NMR in the ferromagnetic hydride $EuLiH_3$, 105
Lutetium
thermodynamic studies of hydrides of R_6Fe_{23} (R = Y, Er, Ho, Lu) and R_6Mn_{23} (R = Gd, Dy, Er, Ho), 421

Magnesium
calorimetric investigation of the phase transition exhibited by the hydride of Mg_2Ni, 545
experimental and theoretical investigation of the densities of states of Mg_2CoH_5, 267
study of the decomposition of Mg hydride by thermal analysis, 395
theoretical study of the X-ray absorption spectra of Mg_2FeH_6, 293
Magnetic order
magnetic order of the non-stoichiometric light RE dideuterides, 205
Magnetic properties
effect of Ni, Gd and La substitution on the magnetic properties of Y_2Co_7 hydride, 47
effect of rhombohedral distortion on the magnetic properties of $REFe_2$ hydrides (RE = Er, Tb), 89
magnetic and electronic properties of Hf_2Fe hydrides, 163
magnetic, crystallographic and H_2 absorption properties of YMn_2 and $ZrMn_2$ hydrides, 25
magnetic properties of NdH_{2+x} compounds, 55
on the breakdown of the Fe sublattice long-range magnetic order in RFeAl hydrides (R = rare earth), 181
recent magnetic studies of complex metal hydrides, 33
the influence of hydrogenation on the magnetic properties and hyperfine interactions of amorphous Fe–Zr alloys, 17
thermodynamic, structural and magnetic properties of $LaNi_{5-x}Fe_x$ hydrides, 111
Magnetic susceptibility
magnetoresistance and magnetic susceptibility of hydrides of disordered Ni–Mn alloys, 201
^{51}V NMR and magnetic susceptibility study of the electronic structure in Ti–V dihydrides, 193
Magnetoresistance
magnetoresistance and magnetic susceptibility of hydrides of disordered Ni–Mn alloys, 201
Manganese
magnetic, crystallographic and H_2 absorption properties of YMn_2 and $ZrMn_2$ hydrides, 25
magnetoresistance and magnetic susceptibility of hydrides of disordered Ni–Mn alloys, 201
surface properties of $LaNi_3Mn_2$ H_2-storage material, 517
thermodynamic studies of hydrides of R_6Fe_{23} (R = Y, Er, Ho, Lu) and R_6Mn_{23} (R = Gd, Dy, Er, Ho), 421
Microbalance
a computer controlled microbalance rig for pressure–composition isotherm measurements, 541
Misch metal
surface properties on H_2 storage material TiFeMm, 535
Monte Carlo calculations
comparison of analytical approximations for H_2 in b.c.c. metals with Monte Carlo calculations, 403
Mössbauer spectroscopy
conversion electron Mössbauer spectroscopy on surface layers of activated FeTi, 511
Mössbauer and time-differential PACS of the hydrides and deuterides of vanadium, 173

Neodymium
magnetic properties of NdH_{2+x} compounds, 55
Neptunium
a re-examination of the Np–H system, 431
Neutron radiography
coherent phase transition in NbH_x studied by neutron radiography, 147

Neutrons
separation of crystal-field levels and phonons in the RE dihydrides using polarized neutrons, 204
Neutron vibrational spectroscopy
neutron vibrational spectroscopy and H_2 potential of β-V_2H, 203
Nickel
calculation of H_2 dissociation pathways on Ni using the embedded atom method, 465
calorimetric investigation of the phase transition exhibited by the hydride of Mg_2Ni, 545
effect of Ni, Gd and La substitution on the magnetic properties of Y_2Co_7 hydride, 47
electron binding energies and oxidation behaviour in UNiAl, YNiAl and ZrNiAl, 503
electronic properties of $LaNi_5$ and $LaNi_5H_7$, 219
electronic structure of hydrogen in Ni and its trapping by impurities, 275
enthalpies of formation and hydrogenation of $LaNi_{5-x}Co_x$ compounds, 542
magnetoresistance and magnetic susceptibility of hydrides of disordered Ni–Mn alloys, 201
modifications near the surface owing to H_2 cycling of the intermetallics $LaNi_5$ and $LaNi_{5-x}Al_x$, 491
surface properties of $LaNi_5Mn_2$ H_2-storage material, 517
thermodynamic, structural and magnetic properties of $LaNi_{5-x}Fe_x$ hydrides, 111
Niobium
coherent phase transition in NbH_x studied by neutron radiography, 147
electronic rearrangement in the dilute V and Nb hydrides, 209
ordered phases in Nb hydride: predictions using lattice–gas models, 319
^{15}Nitrogen reaction method
analysis of H_2 depth profiles in a Ta–Ti sandwich film by the ^{15}N reaction method, 525
Nuclear magnetic resonance
proton NMR in the ferromagnetic hydride $EuLiH_3$, 105
proton NMR in the paramagnetic state of GdH_3, 187
^{51}V NMR and magnetic susceptibility study of the electronic structure in Ti–V dihydrides, 193

Palladium
absorption of H_2 in Pd–Co and Pd–U alloys, 375
absorption of H_2 in ultrathin Pd and Pd-based alloys, 61
electrical resistance and H_2 solubility anomalies in a Pd–8at.%Y solid solution alloy, 79
hydrogen dynamics in the near surface region of Pd, 459
new experiments on and interpretations of hysteresis effects of Pd–D_2 and Pd–H_2, 351
photoemission study of the electronic structure of Zr–Pd compounds and their relation to hydride formation, 301
pressure–composition isotherms of thin PdH_c films, 415
solubility of H, D and T in Pd–Ag alloys at low H_2 concentrations, 387
two-phase theory of thermodynamic aspects of Pd hydride, 544
Paramagnetism
proton NMR in the paramagnetic state of GdH_3, 187
Perturbed angular correlation studies
γ—γ PACS of Dy hydrides, 155
Mössbauer and time-differential PACS of the hydrides and deuterides of vanadium, 173
Phase diagrams
clean autoclave system for crystal growth and phase diagram studies (about 2500 bar, 1700 °C), 543
phase diagrams of some rare earth hydrides, 542
the phase diagram of the V–T system, 453
Phase equilibria
calculation of phase equilibria in H–metal systems, 339
Phase transitions
calorimetric investigation of the phase transition exhibited by the hydride of Mg_2Ni, 545
coherent phase transition in NbH_x studied by neutron radiography, 147

Photoelectrodes
surface study on thin layers of oxidized Ti–Fe alloys as semiconducting photoelectrodes for the production of H_2, 529
Photoemission
photoemission study of the electronic structure of Zr–Pd compounds and their relation to hydride formation, 301
Physical properties
thermodynamic and physical properties of Y and some rare earth hydrides, 441
Pressure–composition isotherm
computer controlled microbalance rig for pressure–composition isotherm measurements, 541
electronic density of states from pressure–composition isotherms in metal hydrides, 307
pressure–composition isotherms of thin PdH_c films, 415
Pressure–composition–temperature properties
a numerical expression of the *P–C–T* properties of metal hydrides, 365

Rhombohedral distortion
effects of rhombohedral distortion on the magnetic properties of $REFe_2$ hydrides (RE = Er, Tb), 89

Semiconduction
surface study on thin layers of oxidized Ti–Fe alloys as semiconducting photoelectrodes for the production of H_2, 529
Silver
solubility of H, D and T in Pd–Ag alloys at low H_2 concentrations, 387
Spinodals
spinodals and catastrophes, 544
Statistical models
statistical model for the distribution of H and D atoms around substitutional (interstitial) trapping centres, 202
Stress-induced states
nature and some consequences of stress-induced states of H_2 in b.c.c. metals, 202
Structural properties
comparison of structures and electronic properties between $TiCoH_x$ and $TiFeH_x$, 69
thermodynamic, structural and magnetic properties of $LaNi_{5-x}Fe_x$ hydrides, 111
effect of H_2 absorption on the electronic and structural properties of V–Fe alloys, 307
Superconductivity
electron–phonon coupling and superconductivity of H_2 implanted aluminium, 123
Surface properties
surface properties of $LaNi_3Mn_2$ H_2-storage material, 517
surface properties on H_2 storage material TiFeMm, 535

Tantalum
analysis of H_2 depth profiles in a Ta–Ti sandwich film by the ^{15}N reaction method, 525
calorimetric determination of the e.f.g. in $TaH(D)_{0.5}$, 542
lattice location study of H in Ta by the channelling method, 207
Terbium
effects of rhombohedral distortion on the magnetic properties of $REFe_2$ hydrides (RE = Er, Tb), 89
Thermal analysis
study of the decomposition of Mg hydride by thermal analysis, 395
Thermodynamic properties
thermodynamic and physical properties of Y and some rare earth hydrides, 441
thermodynamic, structural and magnetic properties of $LaNi_{5-x}Fe_x$ hydrides, 111
Titanium
adsorption and subsequent dissolution of H_2 in $FeTi_{1.14}O_{0.03}$, 497
analysis of H_2 depth profiles in a Ta–Ti sandwich film by the ^{15}N reaction method, 525
comparison of structures and electronic properties between $TiCoH_x$ and $TiFeH_x$, 69
conversion electron Mössbauer spectroscopy on surface layers of activated FeTi, 511

hydriding behaviour of FeTi and $TeTi_{1.15}$: ease of activation and skipping of β region, 139
H_2 profiling in FeTi, 463
surface properties on H_2 storage material TiFeMm, 535
surface study on thin layers of oxidized Ti–Fe alloys as semiconducting photoelectrodes for the production of H_2, 529
the activation of FeTi for H_2 absorption: progress and possibilities, 459
^{51}V NMR and magnetic susceptibility study of the electronic structure in Ti–V dihydrides, 193

Tritium
the phase diagram of the V–T system, 453

Tunnelling
anelastic relaxation due to the tunnelling of H and D in some transition metals, 206

Uranium
absorption of H_2 in Pd–Co and Pd–U alloys, 375
electron binding energies and oxidation behaviour in UNiAl, YNiAl and ZrNiAl, 503

Vanadium
effect of H_2 absorption on the electronic and structural properties of V–Fe alloys, 307
electronic rearrangement in the dilute V and Nb hydrides, 209
H_2 in Fe, V and FeV: heat of formation, lattice location and the hydrogen–metal bond, 285
Mössbauer and time-differential PACS of the hydrides and deuterides of vanadium, 173
neutron vibrational spectroscopy and H_2 potential of β-V_2H, 203
the phase diagram of the V–T system, 453
^{51}V NMR and magnetic susceptibility study of the electronic structure in Ti–V dihydrides, 193

X-ray absorption spectra
theoretical study of the X-ray absorption spectra of Mg_2FeH_6, 293

Yttrium
effect of Ni, Gd and La substitution on the magnetic properties of Y_2Co_7 hydride, 47
electrical resistance and H_2 solubility anomalies in a Pd–8at.%Y solid solution alloy, 79
electron binding energies and oxidation behaviour in UNiAl, YNiAl and ZrNiAl, 503
magnetic, crystallographic and H_2 absorption properties of YMn_2 and $ZrMn_2$ hydrides, 25
thermodynamic and physical properties of Y and some rare earth hydrides, 441
thermodynamic studies of hydrides of R_6Fe_{23} (R = Y, Er, Ho, Lu) and R_6Mn_{23} (R = Gd, Dy, Er, Ho), 421

Zirconium
electron binding energies and oxidation behaviour in UNiAl, YNiAl and ZrNiAl, 503
magnetic, crystallographic and H_2 absorption properties of YMn_2 and $ZrMn_2$ hydrides, 25
photoemission study of the electronic structure of Zr–Pd compounds and their relation to hydride formation, 301
the influence of hydrogenation on the magnetic properties and hyperfine interactions of amorphous Fe–Zr alloys, 17
